

KOMALKUMAR REDDY PALWAI

Software Developer

komalreddypalwai@gmail.com | +918309897937 | Hyderabad Telangana

LeetCode | Portfolio | GitHub | LinkedIn

EDUCATION

Ace Engineering College

computer science and engineering(ds) B.Tech

CGPA: 8.3

aushapur

November 2022 - May 2026

EXPERIENCE

CodeMinds Technologies | Full Stack Developer

Hyderabad, india | February 2025 - September 2025

- Built **responsive and scalable web applications** using **React.js**, **Tailwind CSS**, **Node.js**, and **MongoDB**, integrating RESTful APIs for seamless data flow.
- Converted **UI/UX designs into optimized, reusable components** and developed admin dashboards to streamline business operations.
- Improved **application performance, cross-device compatibility, and backend efficiency** through structured architecture and clean implementation.

Array Minds | Salesforce Developer

Hyderabad, india | January 2026 - Present

Integrated payment gateway solutions in Salesforce applications

- Implemented live delivery tracking system for real-time order monitoring
- Developed CRM & ERP features using LWC, Apex, and Salesforce Flows
- Automated Sales Orders, Invoices, and Payment processes

SKILLS

Programming Languages: Python, JavaScript, Apex, HTML, CSS

Libraries/Frameworks: React.js, Node.js, Express.js, Tailwind CSS, Bootstrap, Lightning Web Components (LWC)

Tools / Platforms: Git, GitHub, VS Code, Postman, MongoDB Atlas, UiPath, Salesforce, AWS

Databases: MongoDB, MySQL, SOQL, SOSL

PROJECTS / OPEN-SOURCE

Maxx Solutions | Link

React.js, Node.js, Express.js, MongoDB, TailwindCSS, JWT

- Engineered a secure **MERN-based online testing platform** implementing **JWT authentication and role-based access control**.
- Architected admin-driven exam workflows with scheduling constraints, attempt limits, and integrity safeguards (tab monitoring, full-screen enforcement).
- Built a scalable **Node.js + MongoDB backend** integrated with a responsive React dashboard, optimizing performance, security, and structured data handling.

Dealer Management System (DMS) | Link

Salesforce, LWC, Apex, JavaScript, SOQL, Salesforce Flows

Developed CRM & ERP functionalities for Dealer Management System (DMS) on Salesforce

- Built modules for Sales Orders, Purchase Orders, Invoices, Payments, and Dealer Operations
- Implemented live delivery tracking and payment gateway integration features
- Developed interactive UI components using Lightning Web Components (LWC)
- Automated business workflows using Apex and Salesforce Flows
- Improved operational efficiency through real-time tracking and process automation

TrueBill Generator | Link

React.js, Node.js, Express.js, MongoDB, Firebase, Tailwind CSS, WhatsApp

API, PDF libraries

- Developed a **full-stack invoicing platform** with billing, client management, and structured record tracking.
- Implemented **secure authentication, real-time invoice generation, and personalized dashboards** to streamline financial workflows.

- Engineered a **scalable Node.js/Express backend with MongoDB**, integrating PDF exports and WhatsApp sharing within a responsive, mobile-friendly UI.

CERTIFICATIONS

- Python for Data Science - **IBM**
- AWS Cloud Practitioner Essentials - **AWS**
- Python Essentials 1 - **Cisco**
- Python Essentials 2 - **Cisco**
- Introduction to Cybersecurity - **Cisco**
- Pearson MePro Level 10 Expert - **Pearson MePro**
